

Who we are

Far East Creation (FEC) provides total solution for your IT needs. Establish in 2003, we have been serving companies that outperform their competitors. We have been a part of these companies as system developer, solution integrator, network outsourcing, IT consulting, and surveillance system deployment.

Services

Software Development

With business as competitive as ever, every business unit has to function effectively to gain every advantage to stay ahead. With strategy established but no one to deploy, these businesses have turned to FEC to fulfill their technology needs.

- FEC development team specializes in Object-Oriented programming. This gives us the advantage of developing system that supports real world business needs as well as faster turnaround time than traditional programming methodology.
- We use Unified Modeling Language (UML) to design your system to ensure that it is working at optimum efficiency.
- We deploy our own development process which is in accord to Capability Maturity Model Integration (CMMI). This is to ensure our clients that our systems are developed according to plan, fulfilling requirements, and within budget.
- FEC not only delivers system that works. Upon delivery, we also deliver our design documents as well as conduct in-house training to get users to familiar with the system as soon as possible.

Network Maintenance Outsourcing

FEC offers network maintenance outsourcing service to small and medium size business. We have professionals with experience in establishing networks for new as well as existing businesses. You can ensure that your network communication is uninterrupted.

- Proven records have shown that our clients are satisfied with our service while saving the cost of establishing their own IT department.
- Our team is dedicated to servicing and ensuring that our clients enjoy trouble-free network communications. We are available on call to troubleshoot any network failure.

IT Consulting

FEC offers IT consulting service to businesses that wish to gain advantage by the means of technology. We have professionals that involved in various projects from new business to state enterprise.

FEC has the total package for your IT needs. We find solution for you.
