

Far East Creation Limited Partnership

Web Application Outsourcing

Far East Creation provides web application outsourcing service to companies that seek faster, more reliable, and on time customize IT projects. Our service extends to not only developing reliable web application but also integrating modules for leading application providers. Here is what we have been providing to our clients.

Your benefits to you

On Time

We have been repeatedly delivering projects on time and our clients have been coming back for more.

Reliable Process

With years of experience, we have created our development process that not only produces high efficiency application but also dynamic.

Knowledgeable Resources

Our staffs have years of experience in the field. What's more, they are certified with leading vendors such as Microsoft © and Java ©.

Involvement

We have project server for our clients to access on-going projects. This is to let our clients monitor updates as the projects are developed.

*Both sites have to have internet accessibility with min speed of 256kpbs.

**Amount of data is determined by storage space provided.

***Achievable only for units with IR availability
